THEOCHEM, VOLUME 52 (1989)

(Journal of Molecular Structure, Vol. 183)

SUBJECT INDEX

Aluminosilicates,
theoretical interpretation of ^{29}Si NMR chemical shifts of aluminosilicates. Part 2. The Si–O–T (T = Si or Al) bond angle dependence 223
Ammonium cation,
a SCF MO study on the reaction mechanism of quaternary ammonium cation with hydroxide ion 311
Anomeric molecules,
the electron density distribution in anomeric molecules 151
Atomic orbital calculations,
gauge-invariant atomic orbital calculations of intramolecular chemical shifts due to molecular fragments 215

Benzensulfonamide inhibitors,
a theoretical study of conformation–electronic structure relationships in benzensulfonamide inhibitors of the carbonic anhydrase enzyme 393

Carbonic anhydrase enzyme,
a theoretical study of conformation–electronic structure relationships in benzensulfonamide inhibitors of the carbonic anhydrase enzyme 393
Catalysis,
cluster isomerism and molecular catalysis 247
C_2H_2,
ab initio study of neutral O_2, SO, S_2, C_2H_2 and their mono- and dications 103
Characterization,
force density method for chemical bond characterization 121
Chemical shifts,
gauge-invariant atomic orbital calculations of intramolecular chemical shifts due to molecular fragments 215
Condensation,
a quantum-chemical study of the mechanism of the "spontaneous self-assembly" reaction in the formation of the black Roussinate monoanion via dimeric condensation of red Roussinate dianion 1
Conjugated circuits,
conjugated circuits in excited valence structures 29
$Cu_3AsSe_6^{6-}$,
molecular orbital calculations of the cluster $Cu_3AsSe_6^{6-}$ 191
Cyclodipeptides,
conformation of cyclodipeptides. Part 8. The model-building algorithm 331

Density distribution,
the electron density distribution in anomeric molecules 151
Dioxopiperazines,
conformation of dioxopiperazines. Part 7. The dependence of the internal coordinates on puckering of the 2,5-dioxopiperazine ring 341

Electronic properties,
molecular structure and electronic properties of hexaethynylbenzene 175
Excited valence structures,
conjugated circuits in excited valence structures 29

Force density method,
force density method for chemical bond characterization 121
Fragment interaction analysis,
fragment interaction analysis in the framework of ab-initio UHF-MO computations. Part 5. Analysis of the conformational preferences in β-substituted ethyl radicals in terms of orbital interaction 301
Free radicals,

ab initio calculations of nitrogen containing free radicals: the geometrical parameters of HFNȮ, H_2CNȮ and HFCNȮ radicals 291
2(3H)-Furanone,
MINDO/3 study of the thermolysis of 2(3H)-furanone 143

Guanidine isosters,
ab initio MO calculations of hydrogen bonding between guanidine isosters and carboxylate 371

Hexaethynylbenzene,
molecular structure and electronic properties of hexaethynylbenzene 175
^{1}H hyperfine coupling constants,
INDO-MO *s-p* separation model and the theoretical study of ^{1}H hyperfine coupling constants 233
Hydrogen bonding,
ab initio MO calculations of hydrogen bonding between guanidine isosters and carboxylate 371
o-Hydroxy-phenylacetylene,
a theoretical study of excited state proton transfer to phenylacetylene and within *o*-hydroxy-phenylacetylene 279

Icosahedral C_{60} molecule,
a study of the UV spectrum of the truncated icosahedral C_{60} molecule 271
Interstitial bonding,
the concept of interstitial bonding 45
Isomerism,
cluster isomerism and molecular catalysis 247
parallel and sequential isomerism of activated complexes in organic reactions 197

Ketene,
protonation of ketene and vinylketene. Relative stabilities of isomeric cationic products 319

Methotrexate,
molecular conformations of methotrexate 361
1-Methyl-dihydronicotinamide,
mechanistic aspects of biological redox reactions involving NADH 1: ab initio quantum chemical structures of the 1-methyl-nicotinamide and 1-methyl-dihydronicotinamide coenzyme analogues 161
1-Methyl-nicotinamide,
mechanistic aspects of biological redox reactions involving NADH 1: ab initio quantum chemical structures of the 1-methyl-nicotinamide and 1-methyl-dihydronicotinamide coenzyme analogues 161
Molecular orbital calculations,
molecular orbital calculations of the cluster $Cu_3AsSe_6^{6-}$ 191
Molecular $^1\Delta_g$ oxygen,
solvent induced emission of molecular $^1\Delta_g$ oxygen 207
Molecular structure,
molecular structure and electronic properties of hexaethynylbenzene 175

NADH,
mechanistic aspects of biological redox reactions involving NADH 1: ab initio quantum chemical structures of the 1-methyl-nicotinamide and 1-methyl-dihydronicotinamide coenzyme analogues 161

O_2,
ab initio study of neutral O_2, SO, S_2, C_2H_2 and their mono- and dications 103

Phenylacetylene,
a theoretical study of excited state proton transfer to phenylacetylene and within *o*-hydroxy-phenylacetylene 279
Proton transfer,
a theoretical study of excited state proton transfer to phenylacetylene and within *o*-hydroxy-phenylacetylene 279
Protonation–deprotonation,
protonation–deprotonation of purines and purine nucleosides 381
Purine nucleosides,
protonation–deprotonation of purines and purine nucleosides 381
Purines,
protonation–deprotonation of purines and purine nucleosides 381

RBS^+ cations (R=H,F,Cl),
an ab initio study of the RBS^+ cations (R=H,F,Cl) 183
Redox reactions,
mechanistic aspects of biological redox re-

actions involving NADH 1: ab initio quantum chemical structures of the 1-methylnicotinamide and 1-methyl-dihydronicotinamide coenzyme analogues 161
Ring inversion,
theoretical study of the structure and ring inversion in trimethylene sulphone 135
Roussinate dianion,
a quantum-chemical study of the mechanism of the "spontaneous self-assembly" reaction in the formation of the black Roussinate monoanion via dimeric condensation of red Roussinate dianion 1
Roussinate monoanion,
a quantum-chemical study of the mechanism of the "spontaneous self-assembly" reaction in the formation of the black Roussinate monoanion via dimeric condensation of red Roussinate dianion 1

S_2,
ab initio study of neutral O_2, SO, S_2, C_2H_2 and their mono- and dications 103
SiNH,
the $(SiNH_2)^+$ isomers as intermediates in the interstellar production of SiNH: an ab initio study 17
$(SiNH_2)^+$,
the $(SiNH_2)^+$ isomers as intermediates in the interstellar production SiNH: an ab initio study 17
^{29}Si NMR chemical shifts,
theoretical interpretation of ^{29}Si NMR chemical shifts of aluminosilicates. Part 2. The Si–O–T (T = Si or Al) bond angle dependence 223
SO,
ab initio study of neutral O_2, SO, S_2, C_2H_2 and their mono- and dications 103
Solvent effect,
approximate methods for solvent effects calculations on biomolecules 403
Spirenes,
through-space interactions in spirenes 257
Spontaneous self-assembly,
a quantum-chemical study of the mechanism of the "spontaneous self-assembly" reaction in the formation of the black Roussinate monoanion via dimeric condensation of red Roussinate dianion 1
β-Substituted ethyl radicals,
fragment interaction analysis in the framework of ab-initio UHF-MO computations. Part 5. Analysis of the conformational preferences in β-substituted ethyl radicals in terms of orbital interaction 301

Thermolysis,
MINDO/3 study of the thermolysis of 2(3H)-furanone 143
Trimethylene sulphone,
theoretical study of the structure and ring inversion in trimethylene sulphone 135

UV spectrum,
a study of the UV spectrum of the truncated icosahedral C_{60} molecule 271

Vinylketene,
protonation of ketene and vinylketene. Relative stabilities of isomeric cationic products 319
